

Pain relief **without** drugs...

Can also...

- Promote relaxation
- Reduce anxiety
- Improve digestion
- Regulates breathing
- Improves digestion

Use at home or in the office

Don't just take our word...

“

If my discomfort or lower back pain was described as 100% before using LumbaCurve, I would describe the back pain as 20% afterwards. Very solid - can be re-used again and again, if ever needed. Getting it positioned in the correct part of the lower back can be a problem, but it does work. Uncomfortable to begin with but that is to be expected. Would recommend.

MG Maintenance engineer (Middlesex)

Experience a whole new kind of drug free pain relief.

Experience LumbaCurve™

LumbaCurve™

The most effective lower back pain therapy yet devised.

The ingenious device that could change your life.

What is LumbaCurve?

It's a simple yet ingenious device, painstakingly developed over six years in the UK and Holland, that can bring relief to millions of lower back pain sufferers everywhere. The concept behind LumbaCurve was to combine the best of East and West therapies, designed to combat back pain.

Lumbacurve initially provides a passive gravity assisted traction (PGAT) – put simply it gently stretches the lower back, causing the vertebral joints to separate. This in turn, relaxes the discs and frees up the spinal nerves, thus giving pain relief, as practised by Western physiotherapists, Chiropractors, and Osteopaths.

In addition to this Lumbacurve design features provide the combined benefits of shiatsu stimulation, yogic stretch, and acupressure massage, all recognised techniques, employed in Traditional Oriental Medicine.

LumbaCurve can also be used as a complementary therapy in conjunction with current treatment techniques.

How easy is LumbaCurve to use?

LumbaCurve is simplicity itself to use – just follow the instructions, lie on your back, slide LumbaCurve under your lumbar area, and relax. With minimal effort and time the results can be extraordinary!

Just literally a few minutes a day – at home or in the office or 'as and when'.

Who is LumbaCurve designed for?

Any adults who experience lower back pain as a result of occupational posture related conditions, eg. pc users, drivers, or recreationally aggravated conditions eg sports players / gardeners etc. It must not be used if you have previously had surgery or are pregnant, As with any therapy device, always check with your GP before use.

Does It Work?

Absolutely – see the testimonials on this leaflet – but we only want 100% satisfied customers – If you are not absolutely convinced of the benefits of LumbaCurve, then simply return for a full refund.

I was a bit doubtful at first, but after using LumbaCurve for only a few days, my movement was a lot better, with the pain and swelling gradually reducing.

CC Equestrian (Lancashire)

“

I do a lot of marathon running, but was unable to train at all because of my back 'flaring up' again. A few days on LumbaCurve and the Paris marathon was no problem!
